

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Lawrence W. Yonge III et al. Art Unit : 2666
Serial No. : 09/632,867 Examiner : Inder P. Mehra
Filed : August 4, 2000
Title : METHOD AND PROTOCOL TO ADAPT EACH UNIQUE CONNECTION IN A
MULTI-NODE NETWORK TO A MAXIMUM DATA RATE

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

REPLY TO ACTION OF NOVEMBER 30, 2005

Four independent claims remain pending (1, 9, 10, and 15).

The examiner has rejected each of the independent claims under 35 USC 103(a) as being unpatentable over Marchetto in view of Kaiser and Jalali, and further in view of Foley. The examiner is urged to reconsider and withdraw the rejection. The first three references are the same as used in the prior rejection, and Foley does not add what the first three are missing.

The invention calls for channel adaptation of the multi-carrier transmission to differ for different pairs of transmitter and receiver. Claim 9 expresses this as follows:

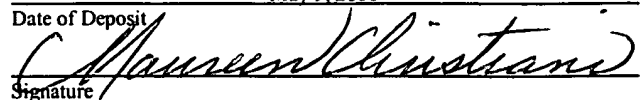

adapting the manner in which carriers are used between particular pairs of transmitter and receiver connected to a channel based on characteristics of the channel, wherein the manner in which at least some carriers are used is different for at least some pairs from the manner in which the same carriers are used for at least some other pairs

CERTIFICATE OF MAILING BY FIRST CLASS MAIL

I hereby certify under 37 CFR §1.8(a) that this correspondence is being deposited with the United States Postal Service as first class mail with sufficient postage on the date indicated below and is addressed to the Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.
